2026 Illinois state-trial summary supplied 8/26/26 · 4 locations · one-year data

WHY IT EARNS A PLACE

Awnless, medium-height workhorse for broad placement north of I-40.

Superior standability and FHB scores support high-fertility yield goals.

Strong overall plant health with a wide-head finish and premium field appeal.

TRAIT SNAPSHOT

MATURITY 2.6 · MEDIUM HEIGHT · AWNLESS

LODGING	WINTER HARD.	FHB	STRIPE RUST
8.5	7.5	8.0	8.0
TEST WEIGHT	BYDV	WSSMV	LEAF RUST
7.0	7.0	7.5	6.5

Additional source ratings: SLB 7.0 · SGB 8.0 · PM 7.0 · SBMV 8.5 · Vern 6.0. WSMV not rated. Ratings: 9 = best, 1 = worst.

MANAGEMENT EDGE · CENTRAL + NORTHERN ILLINOIS

FALL SETUP

Broad fit from Central through Northern Illinois. Plant near/after the fly-free date; use live seeds—not pounds—and raise the rate when delayed.

SPRING BUILD

A strong 8.5 lodging score fits manure/high-fertility acres. Credit manure N and make PGR decisions field by field rather than by habit.

FLOWERING DECISION

Pair Fhb1 and the 8.0 FHB score with risk-based protection. If warranted, target a labeled FHB product at early flowering (Feekes 10.5.1).
